

# FAQ - TechMart Electronics

## General Information

- **What is TechMart Electronics?** TechMart Electronics is a leading provider of premium consumer electronics, smart home devices, and specialized B2B hardware solutions. We focus on high-performance technology designed to integrate seamlessly into modern digital lifestyles.
- **Where are you located?** Our corporate headquarters is located at 999 Innovation Drive, Austin, Texas. We also operate regional distribution centers in Seattle, Washington, and Columbus, Ohio, to ensure rapid shipping across North America.
- **How can I contact customer support?** For fastest service, please use the live chat feature on our website or submit a ticket through your account dashboard. You can also email us directly at [support@techmartelectronics.com](mailto:support@techmartelectronics.com). Phone support is available exclusively for Pro Tier subscribers.

## Account & Billing

- **How do I upgrade my subscription?** Log into your TechMart dashboard, navigate to "Billing Settings," and select "Change Plan." The upgrade will take effect immediately, and your account will be prorated for the remainder of the billing cycle.
- **Do you offer a free trial?** Yes, we offer a 14-day free trial for our Pro Tier software services. No credit card is required to begin the trial.
- **What happens if my payment fails?** We will attempt to process your payment three times over a five-day period. If the payment remains unsuccessful, your account will be temporarily downgraded to a restricted access state until the balance is cleared.

## Technical Support

- **I forgot my password. How do I reset it?** Navigate to the login page and click "Forgot Password." Enter your registered email address, and we will send you a secure link to create a new password. The link expires after 24 hours.
- **My software is crashing. What should I do?** First, ensure you are running the latest version of the application. Next, clear your local cache by navigating to Settings > Advanced > Clear Local Data. If the issue persists, please submit a diagnostic report via the support portal.
- **Is my data secure?** Absolutely. We employ AES-256 encryption for all data at rest and TLS 1.3 for data in transit. We maintain strict compliance with SOC 2 Type II standards.
