

User Manual - TechMart Sync Software

1. System Requirements

- **Operating System:** Windows 10 (64-bit) or later, macOS Monterey (12.0) or later.
- **Processor:** Intel Core i5 / AMD Ryzen 5 or equivalent.
- **RAM:** 8GB minimum (16GB recommended for large data syncs).
- **Storage:** 500MB available disk space for installation.
- **Network:** Broadband internet connection required for cloud synchronization features.

2. Installation Guide

1. Navigate to the TechMart download portal and select the installer for your operating system.
2. Double-click the downloaded executable file (.exe or .dmg).
3. Follow the on-screen prompts. We recommend accepting the default installation directory.
4. Once installed, launch the application and log in using your TechMart credentials.

3. Core Features

3.1 Automatic Cloud Sync

TechMart Sync automatically backs up designated local folders to our secure cloud servers. To configure:

1. Open the application dashboard.
2. Click "Add Folder" and select the local directory you wish to monitor.
3. Toggle the "Auto-Sync" switch to the ON position. The software will detect changes and upload them in the background.

3.2 Version History

Pro Tier users have access to a 30-day version history for all synced files. To restore a previous version:

1. Right-click the file within the TechMart Sync interface.
2. Select "Version History."
3. Browse the timestamps and click "Restore" next to the desired version.

4. Troubleshooting Common Errors

Error Code	Meaning	Solution
ERR_SYNC_01	Authentication Failed	Log out, clear application cache, and log back in. Ensure your password is correct.
ERR_NET_TIMEOUT	Server Connection Lost	Check your local internet

Error Code	Meaning	Solution
		connection. Ensure port 443 is not blocked by your firewall.
ERR_QUOTA_EXCEEDED	Storage Limit Reached	Delete old files from your cloud storage or upgrade your subscription tier.
